

ENGLISH WORKSHEET

SECTION A: READING**Q1.Read the given paragraph and answer the given questions:-**

Soil is one of the most important natural resources on Earth. It is the top layer of the land where plants grow. Soil provides plants with nutrients, water, air for their roots. Without soil, plants cannot grow, and without plants, humans and animals would not survive. This is because plants are the main source of food for all living beings. Soil is also home to many small organisms like earthworms, insects and bacteria. These organisms help keep the soil healthy by breaking down dead plants and animals into useful nutrients.

Soil also helps in storing water and prevents floods by absorbing rainwater. It plays a very important role in farming as crops grow in soil and provide food for us. However, soil is getting damaged due to pollution, cutting of trees and overuse of chemicals. Soil erosion is another problem where the top layer of soil is washed away by wind or water. We should take care of soil by planting trees, reducing pollution and using natural fertilizers.

1. What is soil?
 - a) A type of water b) The top layer of land
 - c) A type of rock d) Air

 2. Why is soil important for plants?
 - a) It gives them sunlight b) It gives them nutrients and support
 - c) It makes them fly d) It changes their color

 3. How does soil help in preventing floods?
-

4. Name two organisms that live in soil.

5. Cutting of _____ damages soil.

SECTION B: GRAMMAR

Q2. Arrange the given words in alphabetical order.

i) Marigold. , Rice , Coconut , Nuts , Pulses
