

## WORLD HEALTH DAY

On '12<sup>th</sup> April 2019 World Health Day' has been celebrated in Modern School, where 'Flameless Cooking' was organized for class Nursery-V where students learn to cook lip smacking recipes without gas or flame. They were divided into the group of 5-6 children and made their own recipes and presented in front of the coordinator ma'am. By this activity the students were taught 'Importance of Healthy Food' and encouraged to avoid junk food.
